PRODUCT APPLICATION PRESENTATION

PRODUCT IDENTIFIER:
PROCESS IDENTIFIER:

TCI 4606 H.D.TM
VEHICLE WASH AND SHEEN

PRODUCT PRESENTATION:

TCI 4606 H.D. is a blend of powerful biodegradable detergents precisely formulated to attack and release the soil structure on surfaces encountered in the transportation industry.

TCI 4606 H.D. features personal and environmental safety, compact storage, economical and energy saving transportation - the **ONE PRODUCT** that can handle all the daily cleaning jobs when used according to directions.

PROCESS INTRODUCTION:

1 - 5 litres of **TCI 4606 H.D.** is charged directly from the shipping container to the **205 L** mixing tank supplied. Add the recommended quantity of cold water and stir. No flammability risk. By performing a simple test determine the desired strength. A variety of applicator systems are available to suit everyone's particular needs.

An air operated diaphragm demand pump which is mounted directly in the washbay over the drum is used to prespray the surface to be cleaned with a 1-5' wand and 100' hose. The operating pump is regulated to 60-80 p.s.i. giving a precise, even coverage. Product consumption is reduced to the absolute required minimum. Due to its high sudsing nature, it provides excellent lubricity to the bristles of the brushes when agitated on the surfaces. Enormous labor savings realized when the surface is finally rinsed with hot or cold water at 3 gallons per minute and 2000 p.s.i.

PROCESS SPECIFICITY:

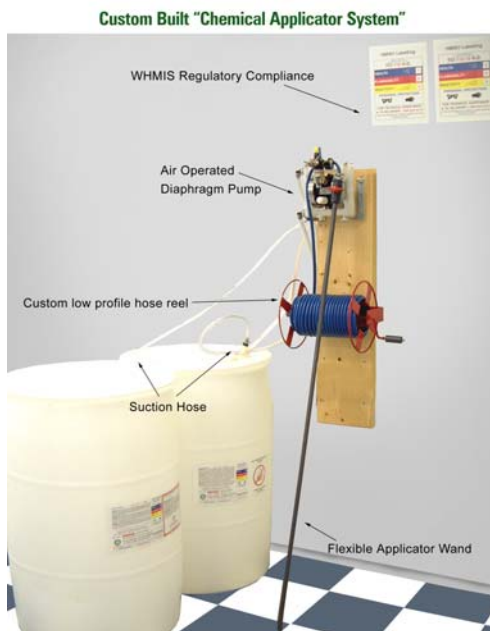

The process can be implemented for cleaning all types of painted surfaces, chrome, ferrous and non-ferrous metals, aluminum (daily or weekly maintenance will not tarnish or dull wheels, fuel tanks or bodies) stainless steel, including all truck accessories. The cleaning can be performed outside or in a wash bay without risk to property, personal or the environment with no corrosive or detrimental effects.

TCI 4606 H.D. has no alkaline builders in its formulation. Its "concentrated and dilute" pH in water is in the range that allows maximum dissolved solids without disrupting the natural crystalline structure that triggers precipitation at a higher pH.

The finished product will be streak free, spotless and protected by an electrostatic neutral film that improves reflectivity of light.

CAUTION

**NEVER SPRAY ANY CHEMICAL ON A
SUN BAKED HOT SURFACE.
COOL IT!**

PACKAGING: 12x001, 4x004, 025, 205 LITRES
